
LightPath Announcement: LightPath Technologies New Product Announcement Glass Aspheres for Laser Tools

LightPath Technologies Introduces Glass Aspheres for Laser Tools

(January, 2009) Orlando, FL. LightPath Technologies, Inc. (Nasdaq: [LPTH](#) - [News](#)),

LightPath Technologies is pleased to announce introduction of a new line of molded glass aspheric lenses designed specifically for the Laser Tool market.

In today's manufacturing environment, laser tools are a common method for generating guide lines and measuring distances or surface profiles. These tools include Laser Levels, Laser Pointers, Line Projectors, Laser Scanners and Laser Trackers. LightPath's aspheric lenses are designed for use in today's high performance laser tools and measurement systems.

Aspheric lenses provide a single lens solution to laser projection. These aspheric lenses provide a cost savings over spherical doublets and triplets without sacrificing performance.

LightPath Technologies can manufacture these lenses in high production volumes through our facility in Jiading, China.
